

Low Dose Naltrexone LDN

Helps Restore Healthy Immune Function

Low dose naltrexone known as LDN therapy has been around for some time and has proven to be very helpful in numerous chronic conditions. The following videos will help explain how LDN works. LDN therapy is useful in many autoimmune conditions such as multiple sclerosis (MS), Crohn's disease, fibromyalgia, Hashimoto's thyroiditis, and other inflammatory and chronic disorders. LDN is FDA approved for use in cancer patients.
